

Appendix No. 2 to Resolution No. 2397 of Senate of Wroclaw Medical University of 27 April 2022

UNIWERSYTET MEDYCZNY IM. Piastów Śląskich we Wrocławiu

Study Programme

Faculty: Faculty of Medicine Major: Medicine (English programme) Level of studies: Uniform Master Studies Form of studies: full-time Education cycle: 2019/2020 – 2024/2025

Basic information

1.	Faculty	Faculty of Medicine	
2.	Major	Medicine (English Programme)	
3.	level of studies	Uniform Master Studies	
4.	education profile	General Academic	
5.	form of studies	Full-time	
6.	number of semesters	12	
7.	number of hours	5 765	
8.	field	Medical Sciences	
9.	professional title	Physician	

Number of ECTS points

10.	required to complete studies	360
11.	for courses in direct contact with university teachers or other academics	360
12.	required to complete courses in the field of humanities or social sciences	6,0
13.	required to complete the course of foreign language	8,5
14.	required to complete optional courses	15,0
15.	required to complete vocational internship	20,0
16.	percentage of the numer of ECTS points for each discipline in the total number of points – if studies are assigned to more than one discipline	not applicable
17.	practical profile includes courses developing practical skills for more than 50% of the total of ECTS points	□ yes X not applicable
18.	general academic profile includes courses related to University's scientific activity in the discipline or disciplines, to which the field of study is assigned, to extent of more than 50% of the number of ECTS points	□ yes X not applicable

Number of hours

19.	Physical Education	60
20.	Vocational Internship	600

STUDY PROGRAMME for 2019/2020 – 2024/2025 education cycle Academic year 2019/2020 1st year

					semester 1,	, 2		
group code	Course	lecture	seminars	other forms	vocational internship	TOTAL HOURS	ECTS POINTS	verification method
А	Anatomy	40	-	120	-	160	16,5	credit/g exam

Learning outcomes

learning outcomes	Learning outcomes	PRK ²
number ¹	Graduate after graduation:	IKK
	KNOWLEDGE (knows and understands)	
A.W1.	anatomical, histological and embryological vocabulary in Polish and English	P7S_WG
A.W2.	the structure of the human body from a topographical (upper and lower limbs,	P7S_WG
	thorax, abdomen, pelvis, back, neck, head) and functional (osteoarticular system,	
	muscular system, cardiovascular system, respiratory system, digestive system,	
	urinary system, sexual systems, nervous system and sensory organs, integument)	
	point of view	
A.W3.	the topographical relationships between the various organs	P7S_WG
A.W4.	basic cellular structures and their functional specialisations	P7S_WG
A.W5.	the micro-architecture of tissues, extracellular matrix and organs	P7S_WG
A.W6.	the stages of development of the human embryo, the structure and function of the	P7S_WG
	foetal membranes and placenta, the stages of development of the various organs,	
	and the effect of harmful factors on the development of the embryo and foetus (teratogenic)	
B.W1.	the water-mineral balance of biological systems	P7S_WG
B.W2.	the acid-base balance and the mechanism of action of buffers and their importance	P7S_WG
D. W 2.	in body homeostasis	175_₩0
B.W3.	the terms: solubility, osmotic pressure, isotonia, colloidal solutions and Gibbs-	P7S_WG
D	Donnan effect	175_00
B.W4.	the basic reactions of inorganic and organic compounds in aqueous solutions	P7S_WG
B.W5.	the physical laws describing fluid flow and factors affecting vascular resistance to	P7S_WG
	blood flow	_
B.W6.	the natural and artificial sources of ionising radiation and their interaction with	P7S_WG
	matter	
B.W7.	the physicochemical and molecular basis of the functioning of the sensory organs	P7S_WG
B.W8.	the physical basis of non-invasive imaging methods	P7S_WG
B.W9.	the physical basis of selected therapeutic techniques, including ultrasound and irradiation	P7S_WG
B.W10.	the structure of simple organic compounds that make up the macromolecules	P7S_WG
	present in cells, the extracellular matrix and body fluids	
B.W11.	the structure of lipids and polysaccharides and their functions in cellular and	P7S_WG
DIVIA	extracellular structures	DEG MUG
B.W12.	the I-, II-, III- and IV-order structures of proteins and post-translational and	P7S_WG
D W12	functional modifications of proteins and their significance	D7C WC
B.W13.	the function of nucleotides in the cell, the I- and II-order structures of DNA and DNA and the structure of shrometin	P7S_WG
B.W14.	RNA, and the structure of chromatinthe functions of the human genome, transcriptome and proteome and the principal	P7S_WG
D. W 14.	methods used to study them, the processes of DNA replication, repair and	175_00
	recombination, transcription and translation and the degradation of DNA, RNA	
	and proteins, and the concepts of regulation of gene expression	
B.W15.	the basic catabolic and anabolic pathways, how they are regulated, and how they	P7S_WG
	are influenced by genetic and environmental factors	
B.W16.	the metabolic profiles of key organs and systems	P7S_WG
B.W17.	the ways in which cells communicate with each other and with the extracellular	P7S_WG
	matrix, and the pathways for transmitting signals within the cell, and examples of	_
	disruption of these processes leading to cancer and other diseases	

Explanation: ¹ Learning outcomes number: W – Knowledge, U – Skills, K – Social Competences ² Symbol of Polish Qualification System

B.W18.	the processes: cell cycle, proliferation, differentiation and ageing of cells, apoptosis and necrosis and their significance for the functioning of an organism	P7S_WG
B.W19.		P7S_WG
B.W20.	to a basic extent the issue of stem cells and their application in medicinethe basics of stimulation and conduction in the nervous system and higher nervous	P7S_WG P7S_WG
D . W 20.	functions, as well as striated and smooth muscle physiology and blood functions	1/3_WU
B.W21.	the function and regulation mechanisms of all organs and systems of the human	P7S_WG
D. W 21.	body, including the cardiovascular system, the respiratory system, the digestive	175_00
	system, the urinary system and the skin, as well as the relationships existing	
	between them	
B.W22.	the course and regulation of reproductive functions in men and women	P7S_WG
B.W23.	the body's ageing mechanism	P7S_WG
B.W24.	the basic quantitative parameters describing the performance of various systems	P7S_WG
	and organs, including the ranges of norms and demographic factors affecting the	
	values of these parameters	
B.W25.	the relationship between factors disturbing the equilibrium state of biological	P7S_WG
	processes and physiological and pathophysiological changes	
B.W26.	the basic IT and biostatistical tools used in medicine, including medical databases,	P7S_WG
	spreadsheets and basic computer graphics	
B.W27.	the basic methods of statistical analysis used in population-based and diagnostic	P7S_WG
	studies	
B.W28.	the potential of modern telemedicine as a tool to support the work of a doctor	P7S_WG
B.W29.	the principles of scientific, observational and experimental research and in vitro	P7S_WG
	studies for the development of medicine	
C.W1.	the basic concepts of genetics	P7S_WG
C.W2.	the phenomena of gene linkage and interactions	P7S_WG
<u>C.W3.</u>	the proper human karyotype and the different types of sex determination	P7S_WG
<u>C.W4.</u>	the chromosome structure and the molecular basis of mutagenesis	P7S_WG
C.W5.	the principles of inheritance of different numbers of traits, inheritance of	P7S_WG
	quantitative traits, independent inheritance of traits and inheritance of non-nuclear genetic information	
C.W6.	the genetic determinants of human blood groups and serological conflict in the Rh	P7S_WG
C.W7.	system the charactions of outcomes and betarrosomes that arouse discoses including	P7S_WG
C.W /.	the aberrations of autosomes and heterosomes that cause diseases, including	P/5_WG
C.W8.	oncogenesis and cancer the factors influencing the primary and secondary genetic balance of the	P7S_WG
C. W 0.	population	1/5_WU
C.W9.	the basis for diagnosis of gene and chromosome mutations responsible for	P7S_WG
J J.	inherited and acquired diseases, including cancer	1,5_00
C.W10.	the benefits and risks of the presence of genetically modified organisms (GMOs)	P7S_WG
	in the ecosystem	
C.W11.	the genetic mechanisms for the acquisition of drug resistance by micro-organisms	P7S_WG
	and cancer cells	
C.W12.	micro-organisms, including pathogenic and those present in the physiological flora	P7S_WG
C.W13.	the epidemiology of viral and bacterial infections, as well as fungal and parasitic	P7S_WG
	infections, taking into account their geographical distribution	
C.W14.	the influence of abiotic and biotic (viruses, bacteria) environmental factors on the	P7S_WG
	human body and human populations and the pathways of their entry into the	
	human body	
C.W15.	the consequences of exposure of the human body to various chemical and	P7S_WG
	biological agents and the principles of prevention	
C.W16.	the invasive forms or stages of development of selected parasitic fungi, protozoa,	P7S_WG
	helminths and arthropods in humans, taking into account their geographical	
	distribution	
C.W17.	the functioning of the parasite-host system and the main symptoms of disease	P7S_WG
	caused by parasites	

		DEG IIIG
C.W18.	the symptoms of iatrogenic infections, the routes of their spread and the pathogens	P7S_WG
C W10	causing lesions in the various organs	DZG MIG
C.W19.	the basics of microbiological and parasitological diagnostics	P7S_WG
C.W20.	the basics of disinfection, sterilisation and aseptic techniques	P7S_WG
C.W21.	the basic development and mechanisms of action of the immune system, including specific and non-specific humoral and cellular immunity mechanisms	P7S_WG
C.W22.	the major histocompatibility complex	P7S_WG
C.W23.	the types of hypersensitivity reactions, types of immunodeficiency and basics of	P7S_WG
	immunomodulation	_
C.W24.	the issues of cancer immunology	P7S_WG
C.W25.	the genetic basis of donor and recipient selection and the basis of transplantation immunology	P7S_WG
C.W26.	the pathomorphological nomenclature	P7S_WG
C.W20.	the basic mechanisms of cell and tissue damage	P7S_WG
C.W27.	the clinical course of specific and non-specific inflammations and tissue and organ	P7S_WG
	regeneration processes	
C.W29.	the definition and pathophysiology of shock, with particular reference to	P7S_WG
	differentiation between causes of shock and multi-organ failure	
C.W30.	the aetiology of haemodynamic disorders, retrograde changes and progressive changes	P7S_WG
C.W31.	the issues in detailed organ pathology, macroscopic and microscopic images and	P7S_WG
	the clinical course of pathomorphological changes in individual organs	_
C.W32.	the consequences of developing pathological changes on topographically adjacent	P7S_WG
	organs	
C.W33.	the external and internal pathogens, modifiable and non-modifiable	P7S_WG
C.W34.	the clinical forms of the most frequent diseases of individual systems and organs, metabolic diseases and disorders of water-mineral, hormonal and acid-base balance	P7S_WG
C.W35.	the individual groups of medicinal products	P7S_WG
C.W36.	the main mechanisms of action of drugs and their age-dependent transformations in the body	P7S_WG
C.W37.	the impact of disease processes on drug metabolism and elimination	P7S_WG
C.W37. C.W38.	the basic principles of pharmacotherapy	P7S_WG
2. w 38. 2.W39.		P7S_WG
	the major adverse drug reactions, including those resulting from drug interactions	
C.W40.	the problem of drug resistance, including multi-drug resistance	P7S_WG
C.W41.	the indications for genetic testing to individualise pharmacotherapy	P7S_WG
C.W42.	the basic trends in the development of therapies, in particular the potential of	P7S_WG
C W/42	cellular, gene and targeted therapies for specific diseases	D7C WC
C.W43.	the basic concepts of general toxicology	P7S_WG
C.W44.	the groups of drugs whose abuse can lead to poisoning	P7S_WG
C.W45.	the symptoms of the most common acute poisonings, including those involving alcohol, drugs and other psychoactive substances as well as heavy metals and calcuted groups of drugs	P7S_WG
C.W46.	selected groups of drugs the basic principles of diagnostic procedures in poisoning	P7S_WG
C.W40.	the basic principles of diagnostic procedures in poisoningthe effect of oxidative stress on cells and its importance in disease pathogenesis	P7S_WG
J. WY 4/.	and ageing processes	1/5_WU
C.W48.	the consequences of vitamin or mineral deficiencies or their excess in the body	P7S_WG
C.W49.	the enzymes involved in digestion, the mechanism of hydrochloric acid production in the stomach, the role of bile, the course of absorption of digestive products	P7S_WG
C.W50.	the consequences of poor nutrition, including prolonged starvation, excessive meals and unbalanced diets, and disturbances in digestion and absorption of digestive products	P7S_WG
C.W51.	the mechanism of action of hormones	P7S_WG
D.W1.	the social dimension of health and illness, the impact of the social environment	P7S_WG P7S_WG
U. W I.	(family, networks of social relations) and social inequalities as well as socio-	1/5_WU

	cultural differences on health, and the role of social stress in health-related and self-destructive behaviours	
D.W2.	the social factors influencing behaviour in health and in illness, particularly in chronic illness	P7S_WG
D.W3.	the forms of violence, models explaining violence in the family and violence in selected institutions, the social determinants of various forms of violence and the role of the doctor in recognising it	P7S_WG
D.W4.	the social attitudes to the meaning of health, illness, disability and old age, the social consequences of illness and disability and socio-cultural barriers, as well as the concept of health-related quality of life	P7S_WG
D.W5.	the principles and methods of communication with the patient and his/her family to build an empathic, trusting relationship	P7S_WG
D.W6.	the importance of verbal and non-verbal communication in communication with the patient and the concept of trust in interaction with the patient	P7S_WG
D.W7.	the psychosocial consequences of hospitalisation and chronic illness	P7S_WG
D.W8.	the functioning of health system entities and the social role of the doctor	P7S_WG
D.W9.	the basic psychological mechanisms of human functioning in health and in sickness	P7S_WG
D.W10.	the role of the patient's family in the process of treatment	P7S_WG
D.W11.	the issue of the adaptation of the patient and his/her family to the illness as a difficult situation and to related events, including dying and the process of family grieving	P7S_WG
D.W12.	the role of stress in the aetiopathogenesis and course of diseases and coping mechanisms	P7S_WG
D.W13.	the mechanisms, aims and treatment of addiction to psychoactive substances	P7S_WG
D.W14.	the principles of health promotion, its tasks and main lines of action, with particular emphasis on knowledge of the role of healthy lifestyle elements	P7S_WG
D.W15.	the principles of motivating the patient towards healthy behaviour and informing about an unfavourable prognosis	P7S_WG
D.W16.	the main concepts, theories, ethical principles that serve as a general framework for properly interpreting and analysing moral-medical issues	P7S_WG
D.W17.	the rights of the patient	P7S_WG
D.W18.	the principles of teamwork	P7S_WG
D.W19.	the cultural, ethnic and national determinants of human behaviour	P7S_WG
D.W20.	the history of medicine, the medicine of primitive societies and the most ancient civilisations and the characteristic features of medieval medicine	P7S_WG
D.W21.	the features of modern medicine and its most important discoveries	P7S_WG
D.W22.	the process of formation of new specialties within the scope of scientific discipline - medical sciences and achievements of leading representatives of Polish and world medicine	P7S_WG
D.W23.	the foundations of evidence-based medicine	P7S_WG
E.W1.	the environmental and epidemiological determinants of the most common diseases	P7S_WG
E.W2.	the principles of nutrition for healthy and sick children, including natural feeding, immunisation and keeping a child's health record	P7S_WG
E.W3.	 the causes, symptoms, principles of diagnosis and therapeutic management of the diseases that are most frequent in children: 1) rickets, tetany, convulsions, 2) heart defects, myocarditis, endocarditis and pericarditis, cardiomyopathy, cardiac arrhythmias, heart failure, hypertension, vaso-vagal episodes, 3) acute and chronic diseases of the upper and lower respiratory tract, congenital malformations of the respiratory system, tuberculosis, cystic fibrosis, asthma, allergic rhinitis, urticaria, anaphylactic shock, angioedema, 4) anaemias, haemorrhagic diathesis, bone marrow failure, childhood cancers, including solid tumours typical of childhood, 5) acute and chronic abdominal pain, vomiting, diarrhoea, constipation, 	P7S_WG

E.U6.	conduct an orientation hearing and visual field examination as well as an otoscopic examination	P7S_UW
E.U7.	assess the general condition, state of consciousness and awareness of the patient	P7S_UW
E.U8.	assess the neonate's Apgar score and maturity and examine neonatal reflexes	P7S_UW
E.U9.	match anthropometric and blood pressure measurements with data on centile grids	P7S_UW
E.U10	assess the stage of sexual maturation	P7S_UW
E.U11.	conduct a balance study	P7S_UW
E.U12.	perform differential diagnosis of the most common diseases of adults and children	P7S_UW
E.U13.	assess and describe the somatic and psychological state of the patient	P7S_UW
E.U14.	recognise immediate life-threatening conditions	P7S_UW
E.U15.	recognise the state of a person under the influence of alcohol, drugs and other stimulants	P7S_UW
E.U16.	plan diagnostic, therapeutic and preventive procedures	P7S_UW
E.U17.	conduct an analysis of possible adverse reactions to and interactions between individual drugs	P7S_UW
E.U18.	propose individualisation of existing therapeutic guidelines and other methods of treatment in the event of ineffectiveness or contraindications to standard therapy	P7S_UW
E.U19.	recognise symptoms of drug dependence and suggest therapeutic management	P7S_UW
E.U20.	qualify the patient for home and hospital treatment	P7S_UW
E.U21.	recognise conditions where the patient's life expectancy, functional status or preferences restrict management according to disease-specific guidelines	P7S_UW
E.U22.	make a functional assessment of a patient with disabilities	P7S_UW
E.U23.	propose a rehabilitation programme for the most common diseases	P7S_UW
E.U24.	interpret laboratory test results and identify causes of deviations from the norm	P7S_UW
E.U25.	administer nutritional treatment, including enteral and parenteral nutrition	P7S_UW
E.U26.	plan the management in the event of exposure to a blood-borne infection	P7S_UW
E.U27.	qualify the patient for vaccination	P7S_UW

E.U28.	collect and preserve material for tests used in laboratory diagnosis	P7S_UW
E.U29.	perform basic medical procedures and treatments including:	P7S_UW
	1) measurement of body temperature (surface and deep), heart rate measurement,	
	non-invasive blood pressure measurement,	
	2) monitoring of vital signs with a cardiomonitor, pulse oximetry,	
	3) spirometric examination, oxygen treatment, support and mechanical ventilation,	
	4) inserting an oropharyngeal tube,	
	5) intravenous, intramuscular and subcutaneous injections, peripheral venous	
	cannulation, collection of peripheral venous blood, collection of blood for culture,	
	collection of arterial blood, collection of arterialised capillary blood,	
	6) taking nasal, throat and skin swabs,	
	7) bladder catheterisation in women and men, gastric probing, gastric lavage,	
	enema,	
	8) standard resting electrocardiogram with interpretation, electrical cardioversion	
	and cardiac defibrillation,	
	9) simple strip tests and blood glucose measurement	
E.U30.	assist in performing the following medical procedures and treatments:	P7S_UW
	1) transfusion of blood and blood products,	
	2) the drainage of the pleural cavity,	
	3) the pericardiocentesis,	
	4) the puncture of the peritoneal cavity,	
	5) the spinal tap,	
	6) the fine-needle biopsy,	
	7) the epidermal tests	
	8) the intradermal and the scarification tests and interpreting their results	
E.U31.	interpret the pharmaceutical characteristics of medicinal products and critically	P7S_UW
	evaluate advertising material for medicines	
E.U32.	plan specialist consultations	P7S_UW
E.U33.	implement basic medical treatment for acute poisoning	P7S_UW
E.U34.	monitor the condition of a patient poisoned by chemicals or drugs	P7S_UW
E.U35.	assess pressure sores and apply appropriate dressings	P7S_UW
E.U36.	deal with injuries (apply a dressing or immobiliser, dress and stitch up a wound)	P7S_UW
E.U37.	recognise patient agony and pronounce patient's death	P7S_UW
E.U38.	maintain patient medical records	P7S_UW
F.U1.	assist in a typical surgical procedure, prepare the surgical field and administer	P7S_UW
	local anaesthetic to the surgical area	
F.U2.	use basic surgical instruments	P7S_UW
F.U3.	comply with the principles of asepsis and antisepsis	P7S_UW
F.U4.	dress a simple wound, apply and change a sterile surgical dressing	P7S_UW
F.U5.	insert intravenous line	P7S_UW
F.U6.	examine the nipples, lymph nodes, thyroid gland and abdominal cavity in terms of	P7S_UW
	the acute abdomen and perform a finger examination through the rectum	
F.U7.	assess the radiographic findings for the most common types of fracture,	P7S_UW
	particularly long bone fractures	DEC
F.U8.	perform temporary immobilisation of the limb, choose the type of immobilisation	P7S_UW
	necessary for use in typical clinical situations and check the supply of the blood to	
	the limb after applying immobilisation dressing	DEG
F.U9.	treat external bleeding	P7S_UW
F.U10.	perform basic resuscitation using an automated external defibrillator and other	P7S_UW
	emergency procedures as well as first aid	
F.U11.	act in accordance with the advanced resuscitation algorithm	P7S_UW
F.U12.	monitor the patient's condition in the postoperative period based on basic vital signs	P7S_UW
F.U13.	recognise signs and symptoms indicative of abnormal pregnancy (abnormal	P7S_UW
	bleeding, contractile activity of the uterus)	

F.U14.	interpret the results of physical examination of a pregnant woman (blood pressure,	P7S_UW
	maternal and foetal heart rate) and the results of laboratory tests indicative of	
	pathologies in pregnancy	
F.U15.	interpret cardiotocography (CTG) recordings	P7S_UW
F.U16.	recognise the beginning of labour and its abnormal duration	P7S_UW
F.U17.	interpret subjective and physical symptoms during puerperium	P7S_UW
F.U18.	establish recommendations, indications and contraindications for the use of	P7S_UW
	contraceptive methods	
F.U19.	carry out ophthalmic screening	P7S_UW
F.U20.	recognise ophthalmic conditions requiring immediate specialist assistance and	P7S_UW
	provide initial qualified assistance in cases of physical and chemical injury to the	
	eye	
F.U21.	assess the condition of an unconscious patient according to international rating	P7S_UW
	scales	
F.U22.	recognise the symptoms of increasing intracranial pressure	P7S_UW
F.U23.	assess the indications for and participate in the carrying out of a suprapubic	P7S_UW
	aspiration	
F.U24.	assist with typical urological procedures (diagnostic and therapeutic endoscopy of	P7S_UW
	the urinary tract, lithotripsy, prostate puncture)	
F.U25.	perform a basic ENT examination of the ear, nose, throat and larynx	P7S_UW
F.U26.	carry out an orientation hearing test	P7S_UW
G.U1.	describe the demographic structure of the population and on this basis assess the	P7S_UW
	health problems of the population	—
G.U2.	collect information on the presence of risk factors for infectious and chronic	P7S_UW
	diseases and plan preventive actions at different levels of prevention	
G.U3.	interpret the measures of prevalence of disease and disability	P7S_UW
G.U4.	evaluate the epidemiological situation of diseases commonly occurring in the	P7S_UW
	Republic of Poland and worldwide	
G.U5.	explain to recipients of medical services their basic entitlements and the legal basis	P7S_UW
0.000	for providing these services	178_011
G.U6.	prepare medical certificates for patients, their families and other parties	P7S_UW
G.U7.	recognise, when examining a child, behaviours and symptoms that indicate the	P7S_UW
3.07.	possibility that violence against the child may have occurred	175_0
G.U8.	act in such a way as to avoid medical errors	P7S_UW
G.U9.	draw blood samples for toxicological tests and secure material for haemogenetic	P7S_UW
0.09.	tests	175_0 W
	SOCIAL COMPETENCES (is ready to)	
K1.	establish and maintain deep and respectful contact with patients, as well as to show	P7S_KR
N 1.	understanding for differences in world-related outlooks and cultures	1/5_KK
K2.		DTS KO
	be guided by the well-being of a patient	P7S_KO
<u>K3.</u>	respect the medical confidentiality and rights of a patient	P7S_KO
K4.	take action toward patients on the basis of norms and ethical principles with an	P7S_KK
17.5	awareness of social determinants and limitations resulting from the disease	DZG KK
K5.	see and recognize one's own limitations and to self-assess educational deficits and	P7S_KK
	needs	DZG VD
K6.	promote health-promoting behaviors	P7S_KR
K7.	use objective sources of information	P7S_KK
K8.	formulate conclusions from their own measurements or observations	P7S_KK
K9.	implement the principles of professional camaraderie and cooperation in a team of	P7S_KR
	specialists, including representatives of other medical professions, including in a	
	multicultural and multinational environment	
K10.	formulate opinions on various aspects of professional activity	P7S_KR
K11.	take responsibility for decisions taken in the course of professional activity,	P7S_KR
	including in terms of their own and other people's safety
