CONFERENCE VENUE

In 2025 the conference will be held in Wrocław, Poland and also via MS Teams for those who can't take part in person.

CONFERENCE TOPICS

International Academic Conference "e-methodology" is dedicated to the difficulties connected with research in medical, social sciences and humanities conducted by means of the Internet, as well as the opportunities that it provides. We accept theoretical lectures on this subject and lectures presenting the results of research and projects conducted on or by means of the Internet (understood as a research environment and/or a research tool). We would like the authors to pay special attention to the specificity of "Internet methodology".

We propose three sections:

1) Information, epidemiology, methodology
2) E-health, AI in education, medicine and healthcare
3) Education, social (new) and traditional media listening

CONFERENCE ORGANIZER

Wroclaw Medical University
