ANNOTATION

The Erasmus+ values introduced in 2021 play a significant role in elevating the programme to a new level, with the potential to make a profound impact on future society. However, due to the broad definitions of these priorities, it can sometimes be challenging to effectively communicate the values of inclusion, sustainability, digitalization, and civic engagement to students and staff on an individual level. In this BIP, we will learn from one another how to integrate concrete initiatives and activities at the institutional level, so they can organically support and complement the mobility of both outgoing and incoming participants.

The BIP consists of two main parts:

1) a training part based on lectures given by Charles University experts and 2) an interactive part consisting of good practice sharing, ideas exchange, and vivid discussions. In addition, an informal network will be established to foster stronger cooperation for future Erasmus+ priorities development.

HIGHLIGHTS

INCLUSION

- Effective support strategies for exchange students with special needs and fewer opportunities, focus on motivating those groups to go abroad
- Promoting psychological well-being during Erasmus+ mobility, addressing the impact of a new environment on students' mental health

SUSTAINABILITY

- Integrating sustainability-focused initiatives into students' everyday life during mobility
- Promoting sustainable travel, featuring key findings and recommendations from the Sustainable Erasmus+ Travel KA2 project

DIGITALIZATION

- Maximizing the potential of Blended Intensive Programmes (BIPs) through effective promotion, high-quality design, and sustainable implementation
- Enhancing digital competencies during Erasmus+ mobility, including courses on AI and advanced digital skills

CIVIC ENGAGEMENT

- Strategies for making civic engagement an integral part of Erasmus+ experience
- Tips and tricks how to secure a Buddy for each Erasmus+ student

EXPECTED OUTCOMES

- Enhanced understanding of Erasmus+ priorities and their practical application
- Concrete strategies for integrating inclusion, sustainability, digitalization, and civic engagement into mobility programmes
- Exchange of best practices among staff members from different HE institutions and countries
- Development of an informal network for future collaboration and joint projects
- Actionable ideas to improve student and staff experience during mobility
